Philosophy of Agricultural Science: Social and Ethical Studies of Food, Life and Environment

Professor: Suehara T., Associate Prof.: Akitsu M., Assistant Prof.: Ohishi K.

Philosophy of Agricultural Science is to study of the relation between the Human Society and Agriculture, Environment and Foods. It is one of the branch of Philosophy of Natural Science especially, Agricultural Science, Food Science and Environmental Science.

It is also possible to study by Ethical, Anthropological, Sociological approaches to Food, Agricultural, Environmental problems in the World.

Field work in the Villages of the World

Fieldwork is one of the important methods to understand the modern world problems such as world food problems. Go to the fields in agricultural villages in the world, or go to the food industries and the markets, it is the royal way to understand what happens in the world now. The members of this laboratory go to the villages in Africa, Asia, Europe, South America, and Japan.

Philosophical and Ethical Studies on Agricultural and Food Science

Agricultural Science and Food Science are developed so rapidly. There is the gap between scientific knowledge and social recognition. In our laboratory, we study based on Philosophical, Ethical and Anthropological approaches to communicate the scientific community to the society.
