

TOGETHER, LET'S SAVE THE PLANET... **...FROM THE FOOD CRISIS, PLANT AND ANIMAL DISEASES, GLOBAL WARMING**

First institution in Europe for animal and plant sciences, INRA (National Institute for Agricultural Research - France) carries out mission-oriented research for high-quality and healthy foods, competitive and sustainable agriculture and a preserved and valorised environment.

INRA is recruiting 49 experienced scientists proficient in designing and implementing research projects

> 6 Experienced Research Scientists (CR1)

These positions are open:

- either to candidates with a PhD (or equivalent) and at least 4 years' experience in research,
- or to candidates who can justify an equivalent level of research.

The fields of research of the candidates' projects must concern food and nutrition, agriculture or environment.

> 43 Research Directors (DR2)

These positions are open:

- either to candidates with a PhD (or equivalent) and at least 8 years' experience in research,
- or to candidates who can justify an equivalent level of scientific research.

The research projects should focus on agronomy and environment, social and economic sciences, digital sciences, ecology, animal and plant health, animal and plant genetics and physiology, human nutrition, food safety and process engineering, research management.

Applications are available until **1st September 2014**
