

Special lectures as “Seminar I on Bio-Sensing Engineering”

“Latest Technologies in Research Fields of Food, Energy, and Environment ”

Time : 8:45-10:15, Tuesday

by professional engineers

Room: S-177

Lecture Schedule:

Date	Company	Lecture Title
April 16	Coesia Japan & South Korea	Creativity for Using Different Hi-tech Industry to solve the Issue of Energy, Food and Environment
April 30	Leave a Nest Co., Ltd.	The Future Vision of Plant Factory and Its Application Scenarios by Leave a Nest
May 7	Panasonic Corporation	Panasonic Ideas for living: Energy Solutions Ideas
May 14	Yanmar Co., Ltd	Combine Harvester
May 21	Shibuya Seiki Co., Ltd.	Fruit Grading and Robot Vision Technologies
May 28	Calbee, Inc.	Industrial Technology of Calbee on Potato Chips Production
June 4	Iseki Co., Ltd.	Agricultural Machinery Especially on Rice Transplanters
June 11	Kubota Corporation	Agricultural Machinery Especially on Tractors
June 25	Nisshin Seifun Group Inc.	An Introduction to Flour Milling
July 2	Satake Corporation	Light Based Sorting Machines
July 9	Chubu Electric Power Co., Ltd.	The Energy Situation of Japan and Effort of Electric Power Company
July 16	Toshiba Corporation	Hydro Turbine for Energy Supply
July 23	Ishida Co., Ltd.	Factory Automation for the Food Industry
July 30	Omi Weighing Machine Inc.	Grading Systems for Fruits and Vegetables

Lectures are given in English. All students (Master, PhD, Research students, international and Japanese) are welcome!
